

Drishtee

Natural way to Innovation & Wellness

Committed to Quality & Processes

Dristhee Naturals Products (DNP) was established by industry experts, with an objective to deliver quality dietary, herbal and food ingredients.

DNP specializes in the development and manufacture of herbal extracts, carotenoids, water soluble / dispersible botanicals, nutraceutical ingredients for dietary supplements, functional foods, pharmaceuticals, beverages and cosmeceutical industries.

DNP insists the concept of "Quality Comes First". Dristhee possesses the perfect quality assurance system and implements strict product standard. Our target is to supply natural ingredients under the conditions of the strong R&D ability, advanced testing method and strict quality controlling system.

Drishtee Quality lab is well equipped with all the advanced analytical instruments to constantly monitor the in process samples and the finished products under the supervision of quality assurance department.

At DNP we use premium raw materials; we select whole, medicinal-grade herbs with abundant phyto-constituents and medicinal potency. By supporting farmers that follow Good Agricultural Practices (GAP), we help to ensure sustainable farming of high quality Indian herbs. Advanced Testing to Ensure Quality and Safety, DNP uses Thin Layer Chromatography (TLC) to identify the unique component makeup of an herb to further guarantee its authenticity, and High Performance Liquid Chromatography (HPLC) to ensure that the bio-active constituents are present in proper concentration. Together, the TLC and HPLC guarantee accuracy in species and maximum deliverance of active ingredients in our herbal extracts. All DNP products and ingredients are tested and certified for purity, microbiology, pesticides, heavy metal and solvent residue.
